

DVDPlay Speeds to Market with Intelisys Mobility

Wireless connectivity key to rapid deployment of DVDPlay credit card enabled kiosks for customer convenience, ease of use

PETALUMA, California and Campbell, California --(Market wire)— Intelisys Mobility Solutions has announced today a key customer partnership, DVDPlay. DVDPlay will be utilizing a complete managed solution from Intelisys Mobility Solutions to rapidly deploy its DVD Movie Rental Kiosks nationwide.

“With the Intelisys solution our deployment rates continue at a rapid pace throughout North America, which speaks volumes for the high level of convenience, low price, and ease of use we are creating for our customers. The ability to rent new release movies for just \$1.49 for the first night with no late fees, at stores, where consumers shop every day, is transforming the market,” explained Berger. “Six million movie rentals is a significant market share to capture in a highly competitive environment,” said Chuck Berger, Chairman and CEO, DVDPlay.

“Intelisys Mobility Solutions provides rapid deployment of end-to-end managed solutions for DVDPlay utilizing cutting-edge wireless broadband WAN technology versus traditional DSL based technologies that typically take weeks to deploy,” said Dana Topping, Co-owner, Intelisys Communications, Inc. “Additionally, applications such as rich media can be layered on top of transactional applications for a dynamic customer experience,” said Dana Topping.

The Intelisys approach is a 360-degree lifecycle managed service offering that includes equipment, wireless broadband connectivity, staging and deployment, full reverse logistics, wireless expense and inventory management, application development, and security services.

Intelisys mobile broadband applications include kiosk self service, mobile credit card processing, field service management, security monitoring, field medical treatment, homeland security, law enforcement, and education.

About DVDPlay

DVDPlay (www.dvdplay.com) offers consumers unparalleled convenience, low rental prices and new release DVD movies at kiosks located in grocery stores, convenience stores, military bases and apartment complexes. New releases are just \$1.49 and first-time users can try DVDPlay for free. The easy-to-use, credit card-enabled kiosks hold more than 500 DVDs, ensuring that there will be plenty of the hottest new releases available. There are more than 600 DVDPlay kiosks located in 34 states and Canada, with 2,250 expected to be installed by the end of 2007. DVDPlay's kiosks are networked and powered by patent pending software that enables dynamic pricing, promotions, inventory management, advertising and movie trailer insertions, as well as the capture and measurement of key business metrics. Kiosks are UL, FCC and ADA certified. For information, visit the DVDPlay website at <http://www.dvdplay.com/pr/godwin.html>
